

# ROSEDALE CHAROLAIS

**30th Annual Bull Sale**

Friday 24<sup>TH</sup> May 2019 - 12pm

51 Polled Charolais Bulls

22 Composite Bulls (12 Charolais/Angus & 10 Charolais/Shorthorn)

# LEADING from the front FOR OVER 45 YEARS

Rosedale Charolais are your proven source of top quality polled Charolais genetics.

Rosedale continues to lead the way in Australia's carcass competitions with unrivalled success in recent times. This is a true reflection that our breeding program is on the right track and that our genetics are out performing in a commercial situation.

We have a wide range of bulls to cover all Australian domestic & export markets including stud sire duties. We welcome your inspection and stand 100% behind the bulls we put on offer. We focus on growth and meat quality and this reflected in our carcass competition success.

Now with a branded product for Rosedale Customers there is no better place to source your bulls for maximum crossbreeding profitability.

Our cattle are specifically bred for profitable cross-breeding under Australian conditions.

## ROSEDALE'S PROVEN COMMERCIAL PERFORMANCE IN AUSTRALIA'S BIGGEST INDEPENDENT FEEDLOT TRIALS.

### NSW BEEF SPECTACULAR FEED LOT TRIAL

- 2013 Grand Champion Team, Most Profitable Team Reserve Champion Weight Gain
- 2014 3 Teams in the Top 10 (out of 120 entered) 2nd Most Profitable Team
- 2016 Champion Weight Gain, Most Profitable Team 5th & 6th Overall (76 Teams)
- 2017 Reserve Champion Weight Gain, 2nd most profitable Team. 3rd Overall
- 2018 Riverine Classic Champion

### AUSTRALIAN NATIONAL FIELD DAYS TRIAL

- 2012 Grand Champion Team, 1st Carcass Yield
- 2013 1st Carcass Yield, 2nd Carcass Points 4th overall
- 2014 Champion Individual Steer 2nd Saleable Meat Yield
- 2015 Highest Carcass Points, 2nd Saleable Meat Yield, 3rd gain on Grass, 3rd/20 overall
- 2017 Grand Champion Team, 1st and 2nd Carcass and yield.

### ROYAL AGRICULTURAL SOCIETY BEEF CHALLENGE

- 2012 Grand Champion Domestic Team Reserve Champion Single Steer 2nd Most Profitable Team
- 2013 Grand Champion Export Team Most Profitable Team, 2nd Carcass Yield

# Welcome

Welcome back to the 30th Rosedale Charolais Annual Bull Sale. A bit of a milestone for us and highlights our longevity and commitment to both the breed and the Industry.

The past 12 months have tested the resilience and breeding programs of many farmers across the country. The one common theme stands out for us and that is that in tough times quality stock continue to sell well. We have invested heavily in our genetics and breeding herd and strive to continue to constantly evolve our cattle for the benefit of you - our valued clients.

The thing that satisfies us the most is enjoying clients success and we are proud that we have been able to create new opportunities for our bull clients via the Rosedale Ruby Beef program. Each year we are seeing more clients sell directly into the program and enjoying the benefits. It is something we can recommend highly to those who wish to sell feeder cattle and the charolais x British animals are ideal. We are glad to announce that we are now selling into the EU providing further premiums for those with EU accreditation.

We are pleased to announce that the Rosedale Ruby beef brand is travelling very well in all markets, both domestic and Export. A highlight for the year of 2018 was certainly winning a gold medal at the World Steak Challenge held in London! Was great exposure and recognition of our hormone free branded beef whilst very humbling being up against some of the biggest brands around. Demand for the product is strong and we would love to see more clients participating in supplying cattle.

This year, we are extremely impressed with the presentation of the bulls as well as the depth and quality of our offering. The bulls have handled the drier conditions very well. We have purposefully selected a range of types of bull to suit your different operations and uses. The most important thing our bulls have in common is the focus on growth, carcase quality and marbling, as well as structural soundness and visual appeal. All bulls purchased in this sale come with the Rosedale 12-month guarantee for fertility and structure. We stand 100% behind our breeding program and are willing to back the quality of these bulls. Success for us is realised when we see the dozens of buyers who return each year from across Australia.

Sale bulls are available for viewing at any time leading up to the sale. You are welcome to call us to arrange an inspection or to answer any queries you may have. Supplementary information and pictures of all lots will be available on our web site, [rosedalecharolais.com.au](http://rosedalecharolais.com.au) as well as Rosedale's Auctionsplus sale page.

Thank you for taking time to view our 2019 sale catalogue and we look forward to welcoming you to Rosedale on sale day.

**Michael, Jenny and James Millner**

# Sale Information

## ROSEDALE SALE BULL EBV'S

Rosedale has been a member of breedplan for over 30 years. This has helped assist us to consistently retain and source external genetics that have enabled us to produce the types of cattle you see in our paddocks today.

Genetic gain in growth rates has always been a priority of ours, but we understand sensible calving ease and birthweights need to be maintained. With our own commercial herd of 1000 British bred cows, we are very familiar with the benefits our charolais bulls are delivering in a crossbreeding situation.

The graphs shown are a good 'measuring stick' as to where our sale bulls are compared to the Australian Charolais breed average.

Although we understand that EBV's are not everything we believe they do help to illustrate the types of bulls we are aiming to produce. We submit large amounts of meaningful data each year to breedplan to help ensure the information is as accurate as it can be.

*At Rosedale we are always looking to improve our genetic pool in an effort to further satisfy our clients.*

*We welcome all feedback you may have on our breeding program and objectives.*

## VISUAL ASSESSMENT

When choosing bulls we recommend using a combination of EBVs, Raw Data and visual assessment. Visual assessment is essential to assess physical and structural soundness and is a reasonable indicator of health and temperament.

EBV's are a tool that will help you to make more "educated" decisions when you are choosing breeding stock. Do your homework well before the sale when you have plenty of time and set some parameters for your EBVs that fall within your market requirements, to narrow down potential purchases.

Use this "suitable list" of bulls and spend time looking and assessing the physical characteristics that you require.

## CARING FOR YOUR NEW BULL

Always be considerate to your bulls and handle them with respect and kindness. Handle them quietly, walk them rather than rushing them, treat them with care and in a gentle manner and they will do likewise.

A bull leaving ROSEDALE is leaving the security of a large mob and will arrive in a strange environment at the purchaser's property. Unload him and make sure he has a steer or cow as a companion straight away if you can't put him out into your bull mob immediately.

A young bull can move in with older bulls and settle well, but remember, being the youngest he will get the last of any feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed. Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle the cows quickly and efficiently.

ROSEDALE bulls are used to being handled by stockmen on motor bikes. Most of the fences are electrified and the bulls treat them with respect.

# Sale Information

**INSPECTION:** cattle inspections are welcome at any time prior to the sale by arrangement with the Vendor. Cattle will be yarded into pens by 9am sale day.

**MORNING TEA & LUNCH:** Will be available, Lunch provided by Smoking Brothers from Elwoods eatery in Orange and will showcase some of our Rosedale Ruby Beef.

**HEALTH:** All bulls catalogued have been semen tested and examined by Peter Brown of Bovine Breeders for structural soundness. All of our cattle receive 7 in 1 vaccinations at 4 months of age, then 6 weeks later and an annual booster. They were drenched at weaning and periodically according to worm counts. Cattle were last drenched with Flukozole C together with a 5in1 in March. The sale bulls have been vaccinated for Pestivirus (BVDV).

**All sale bulls have been DNA tested for Pestivirus and are all PI negative.**

**RAW DATA:** All bulls will be scanned prior to the Sale for eye muscle area (EMA), rump and rib fat, marbling (IMF%) as well as sale weight and scrotal measurements. Supplementary sheet available on the day and on the rosedale website, along with photos of all the lots.

**ROSEDALE'S 12 MONTH GUARANTEE:** All stock have been evaluated for structural soundness and fertility. To the best of our knowledge the bulls are in sound working order at the time of the sale. Any claim against the breeding ability or a structural breakdown of any animal must be made in writing and accompanied by a Veterinary Certificate within 12 months of the sale date. Any animal failing to breed may be either replaced with an animal of similar value or credit made available to the value of the purchase price, minus salvage value, for use at a future Rosedale sale. The Purchaser will be responsible for any costs incurred.

**DELIVERY:** A delivery instruction slip must be completed and signed. Stock awaiting delivery will be held free of charge - all care will be taken, but absolutely no responsibility will be accepted for any injury or loss occasioned during, as a consequence of, or in relation to any holding. Rosedale offers a free delivery service locally and to Dubbo. We are more than happy to assist with all deliveries, please speak to us as we will go out of our way to help you get your purchases home safely and economically. We also can deliver cattle to CTLX, which is a transport hub for most major carriers.

**INSURANCE:** Ownership passes at the fall of the hammer. An insurance representative will be in attendance on Sale day.

**TELEPHONE LINK-UP:** Mobile telephones will be available. Please arrange with the Vendor or Agent to ensure a line.

**AUCTIONS PLUS:** Our sale is conducted live on line in real time and will be interfaced on Auctions Plus with the physical auction that is being conducted. A computer is used to bring the on-site bid price to the internet screen for remote bidders to observe. Bidders can bid on computers at their location and the bid is immediately transferred to the auction barn and relayed to the auctioneer. Bidding is only available if registered with Auctions Plus. You must register on-line to their website [www.auctionsplus.com.au](http://www.auctionsplus.com.au) - at least 24 hours prior to the sale. For first time users of Auctions Plus we recommend you register as soon as possible and become familiar with the site. The staff in Sydney are very helpful and happy to guide you through it.

For more information contact:- Auctions Plus - (02)9262 4222

**4% REBATE:** The rebate will be offered to outside agents on the condition that a written introduction is received 48 hours prior to the sale and/or the agent accompanies the purchaser to the sale and settles on their behalf within 7 days. (This clause will be strictly adhered to.)

**TERMS AND CONDITIONS:** Terms of the sale are as per Conditions of Sale NSW Stud Stock.

**PLEASE NOTE:** It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in this sale on this sale premises.

**SALE DAY SAFETY:** All sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are risks associated with cattle handling. **Visitors enter the cattle pens at their own risk. Children must not enter pens.** People entering the yards are at risk of injury. Be especially alert for bulls fighting, and please be aware that the unfamiliar crowds of people seen at sale day places extraordinary pressure on them.

**DISCLAIMER:** People entering upon this property for any purpose whatsoever including attendance at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for theft loss or damage to any property caused or contributed to by us or by any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners their employees contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied no responsibility is accepted for any errors which may have occurred.

# Performance Recording - Breedplan EBV's - How to use them

All bulls in this sale have been managed under identical conditions from the point of weaning, therefore comparisons can be made between animals of similar age. Weights, scans of EMA and IMF% and scrotal measurements will be available on the day of sale to further aid your visual assessment.

**Charolais Group Breedplan** is an advanced genetic evaluation system that provides a genetic description of Charolais cattle for a range of traits influencing fertility, growth and carcase performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all the available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information. EBVs are expressed in the units of measurement for each particular trait and are shown as +ive or -ive values. The Charolais breed average EBV for different traits changes over time as the breed makes genetic progress. The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait. The averages for calves born in 2014 are shown below and at the bottom of the Performance Data Summary. Please note that each breed has their own EBV and cannot be compared across breeds. **All EBVs quoted in this catalogue are Charolais Group Breedplan EBVs and are directly comparable with the EBVs from other Charolais Group Breedplan herds.**

## How to use EBVs

To use these figures successfully you must first determine which characteristics you desire to breed for and then select the EBV which best supports these qualities. It is important to note that in a successful breeding programme it is advisable to maintain balance and not to direct effort toward gaining a single, higher EBV for one particular trait.

**Birth Weight** is a major factor in calving difficulty. Use this EBV to select against birth weight if calving is a problem. The lower the EBV the lighter the calves are expected to be at birth.

**200 Day Growth and Milk** is of particular interest to those targeting high weight gains at an early age to supply to the Domestic and Restaurant trade. Milk should be emphasized if the bull is being used to breed replacement progeny.

**400 and 600 Day Growth** indicates animals with superior weight gains from 12 months to 2 years of age, which would optimize profits in the domestic to Jap Ox markets.

**Accuracy (Acc.%)** provides an indication of the reliability of an EBV. As more performance information becomes available on an animal, it's progeny and relatives, the accuracy of it's EBVs for particular traits increases. The higher the accuracy the less chance the figure for each EBV will vary.

**Index Values** are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system.

**Domestic Index(\$)** Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430kgs (240kg HSCW and 6mm P8 fat) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

**Export Index(\$)** Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700kg (380kg HSCW and 9mm P8 fat) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

**Scrotal Size** is a good indicator of the bull's ability to produce sperm. A 2 year old bull with a testicle size of 34cm or more is regarded as satisfactory. Measurements will be available sale day.

**Top 5% 200 & 400 Day Growth, Top 10% 600 Day Growth and Dom Index, Top 15% Milk and Exp Index, Top 20% Birth Weight.**

Nash is a proper curve bender. Low Birth with Explosive Growth combined with strong milking ability. A great bull that will perform exceptionally well in all commerical breeding scenarios. Long, soft and well put together.

A very impressive young Harry son out of a terrific Dam with strong breeding. Navigator is certainly one of the pick bulls in his mob and carries some really impressive growth numbers. Quality right here and a terrific temperament to boot.

Another well put together bull who ticks a lot of boxes. Some very impressive EBV's, a good combination of French, Canadian and Australian Genetics in his genetic makeup. Good growth yet still soft enough to lay on the fat cover. Another consistent and high quality bull.

## GET CATTLE PERFORMANCE READY WITH MULTIMIN

Effect of Multimin on conception at first cycle<sup>1,2</sup>

Multimin® Injection makes your cattle 'performance ready' by boosting fertility. Applied to breeders four weeks before joining, Multimin 'tops up' levels of essential trace minerals required for optimal performance. Scientific studies conducted in Australia and throughout the world have shown that Multimin can improve early conception rates<sup>1,2</sup>. Visit [au.virbac.com](http://au.virbac.com) or contact Virbac Customer Support on 1800 242 100 to find out how Multimin can get your cattle 'performance ready'.

Shaping the future of animal health

## Managing Yearling Bulls

Yearling Bulls are great way to introduce new genetics into a breeding operation at a faster pace. If managed properly yearling bulls can also potentially be used for an extra joining year than an older bull. Yearling bulls are still growing strongly and tend to be leaner than older bulls carrying less fat reserves. It is important they are managed correctly as they are far more sensitive to poor nutrition, internal and external parasites than older bulls. Much of this management is more about common sense than any thing else.

Our yearling bulls have all passed semen tests in April before most of them were even 12 months old. Good nutrition has sped up their sexual maturity and as can be seen many of the yearling's scrotals have developed very well. For Charolais Bulls 12-14 months Dr Glen Coulter from the Agriculture Canada Research station In Alberta has documented a minimum scrotal circumference of 32cm based on large amounts of research. This figure is used as a minimum benchmark in the selection process for the yearling bulls we allow into this sale.

## Key management steps to Ensuring Success using Yearling Bulls.

-While they are young use them in single joinings or with bulls the same age. This is a far more efficient way to use them and protects them from injury by larger dominant bulls.

- Take a conservative approach in their first year, a maximum of 30 females is a commonly recommended number.

- In their first joining don't use them for too long if conditions get tough. A maximum 8 week joining period is recommended in most conditions, it is important young bulls keep their condition so they continue to develop.

When spelling them give them high quality feed, this will ensure their recovery and continued development.

## Rosedale News and Events

### 2018 World Steak Challenge - Gold medal

Delighted that a Striploin from one of our beasts gained a Gold Medal at the world steak challenge held in London. Up against some of the major brands and meatworks from all over the world we were thrilled with our results in the Grainfed section. It was a major accolade for the Rosedale Ruby Brand.

### Feedlot Trial Success

In the 2018 Merriwa Show Carcase trial held at the Gill Families Alexander Downs feedlot we were thrilled to win champion carcase pen in the lightweight section of the comp. This was our second year in the competition and it is great to see a regional town running such a large and competitive carcase comp wvll supported with large entries from across NSW.

We had a very successful result in the 2017/2018 Australian National Field day feedlot trial winning both 1st and 2nd in the carcase section as well as winning Overall Champion Team (The John Sharpe Perpetual Trophy) for the third time in the competitions history. The steers were charolais/shorthorn and bred at Guerie Homestead.

### 2019 Royal Easter Show

A steer exhibited by Kinross Wolaroi won 1st in its class of 17 on the hoof at the 2019 Sydney Royal Easter show.

This follows on from a Silver Medal awarded to a Rosedale steer exhibited by St Johns College in 2018 and in 2017 The steer awarded overall carcase champion steer of the show was sired by a Rosedale Sire.

# Join the Rosedale Ruby Supply Chain

Your chance to be part of a  
true gate-to-plate Program

## Supplier Specifications:

- Minimum 50% British Breed
- Up to 50% Rosedale Charolais
- No Bos-Indicus Content
- Milk Tooth preferred (2 tooth accepted)
- 400 -500 kg Empty Weight
- EU & Non EU
- 100% Hormone Free
- Attractive Feeder Rates to approved customers
- Carcase Feedback available on request
