# LEADING from the front FOR OVER 50 YEARS

**Rosedale Charolais are your proven source of top quality polled Charolais genetics.**

Rosedale continues to lead the way in Australia's carcass competitions with unrivalled success in recent times.

This is a true reflection that our breeding program is on the right track and that our genetics are out performing in a commercial situation.

We have a wide range of bulls to cover all Australian domestic & export markets including stud sire duties. We welcome your inspection and stand 100% behind the bulls we put on offer. We focus on growth and meat quality and this reflected in our carcass competition success.

Now with a branded product for Rosedale Customers there is no better place to source your bulls for maximum crossbreeding profitability.

**Our cattle are specifically bred for profitable cross-breeding under Australian conditions.**

ROSEDALE'S PROVEN COMMERCIAL PERFORMANCE IN AUSTRALIA'S BIGGEST INDEPENDENT FEEDLOT TRIALS.

## **NSW BEEF SPECTACULAR FEED LOT TRIAL**

- 2013** Grand Champion Team, Most Profitable Team Reserve Champion Weight Gain

- 2017** Highest MSA Indexing Team (Domestic)
- 2019** Champion Domestic Team

# WELCOME TO OUR 31ST ANNUAL BULL SALE

We would like to extend a very warm welcome to Rosedale's 31st Annual Bull Sale. These are somewhat trying times for many but life must go on must go despite this short term disruption. It is especially important for Australian agriculture to progress as the world still needs to eat. When current events pass over we need to ensure we are in a strong position to take advantage of the opportunities that will lie ahead.

Hopefully by now everyone has had some sort of decent rain and is not still stuck in drought like conditions. Its such a nice sight for us to look about and see a bit of green grass and feel the relief of not being worried about keeping loads of hay up to the cattle. The drought sure was savage but lets hope we all learned something beneficial to help us cope and prepare for the next one a little better.

We believe this years sale draft to be very strong from top to bottom of the catalogue. We are so pleased with some of the new genetics coiming through our program. The Silverstream Landmark sons are a total outcross to our herd and bring forward a bit of extra power and strength with out taking away important carcasse traits like fat cover and marbling. We were very pleased with the moderate birthweights of his progeny as Landmark himself carries that extra bone and muscling yet produces moderate calves which is what we strive to achieve.

Rosedale Maverick is another new sire in the Lineup and his progeny are soft, thick and visually very appealing. Maverick is a bull that never fails to impress and came out of a drought summer after joinging 45 cows in a surprisingly strong order and his preg test results were near perfect. He is a definite keeper for the long haul and we hope you enjoy his progeny in the catalogue.

All bulls purchased in this sale come with the Rosedale 12-month guarantee for fertility and structure. We stand 100% behind our breeding program and are willing to back the quality of these bulls.

Sale bulls are available for viewing at any time leading up to the sale. You are welcome to call us or our agents to arrange a private inspection or to answer any queries you may have. Supplementary information and pictures of all lots will be available on [www.rosedalecharolais.com.au](http://www.rosedalecharolais.com.au) as well as Rosedale's Auctionsplus sale page.

Agriculture is defined as an essential service under covid 19 restictions. Producers or their agents looking to buy bulls for the continuation of their breeding program are very much welcome to attend the sale and bid ring side.

In the world of digitalisation please like us on Facebook and Instagram as it is a way of us keeping connected with clients and sharing a little about what we are up to. We also share extra information about some of the lots in the sale.

Thank you for taking time to view our 2020 sale catalogue and we look forward to welcoming you to Rosedale on sale day or at anytime prior.

Michael, Jenny and James Millner

# ROSEDALE CHAROLAIS NEWS

## 2019 RNA Paddock to Palate Champion Domestic Team

Rosedale had a very strong showing taking out 1st and 2nd place in the 2019 70 Day Domestic section of the EKKa's prestigious paddock to plate competition. The two teams of Charolais/Red Angus steers entered Mort and CO's Grass Dale Feedlot in a large field with cattle coming from leading producers northern NSW and Queensland. The Rosedale Steers performed Strongly in the Feedlot averaging 2.6kg/Day weight gain and then Won the Champion Pen Of Carcase's, Reserve Champion Carcase, followed by finishing 2nd and 3rd in the MSA eating quality section of the competition. This was a strong all-round performance and in particular very pleasing to finish so strongly in the carcase section of the competition. It follows our mantra that crossbreeding with carcase focussed Charolais not only delivers strong performance in a grass or grain situation but also leads to quality Meat eating.

## SYDNEY ROYAL BEEF CHALLENGE

Long Term clients Branga Plains Pastoral Company took out the 70 Day Domestic Competition in one of the largest fields ever in the 2019 Sydney Royal Beef Challenge. Branga Plains Pastoral Company operated by Guy and Suz Lord from Walcha dominated all aspects of the competition in a field of 52 entries winning the Champion Team for weight gain, Winning the Live Judging aspect of the competition and Winning Champion team for carcase with the highest total points score on the hook. Obviously they won the overall component as well with their team bred From Rosedale Composite bulls crossed with British based females in their cow herd

## SUPPORT FOR SCHOOLS

Last year Rosedale assisted with providing steers for two local schools (Kinross Wolaroi in Orange and Kelso High School) that were destined for the Sydney Royal Show. Sadly for the students the event was cancelled only weeks before the scheduled judging. The students learn not only how to break in and care for cattle but also basic nutrition and cattle handling skills. Steer shows are a great introduction for many into our industry and we will continue to support our local schools and agricultural students.

# SALE INFORMATION

## ROSEDALE SALE BULL EBV'S

Rosedale has been a member of breedplan for over 30 years. This has helped assist us to consistently retain and source external genetics that have enabled us to produce the types of cattle you see in our paddocks today.

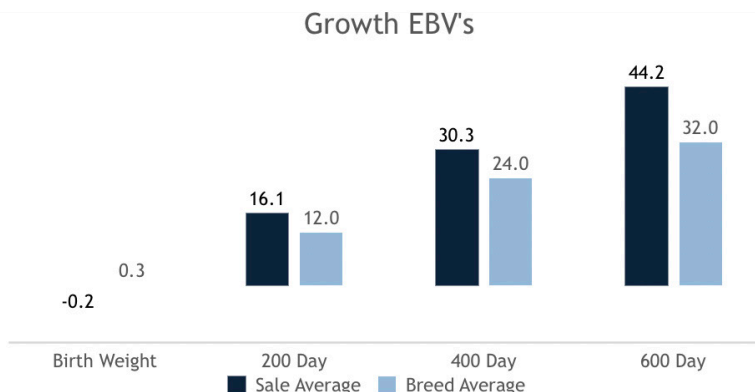

Genetic gain in growth rates has always been a priority of ours, but we understand sensible calving ease and birthweights need to be maintained. With our own commercial herd of 1000 British bred cows, we are very familiar with the benefits our charolais bulls are delivering in a crossbreeding situation.

The graphs shown are a good 'measuring stick' as to where our sale bulls are compared to the Australian Charolais breed average.

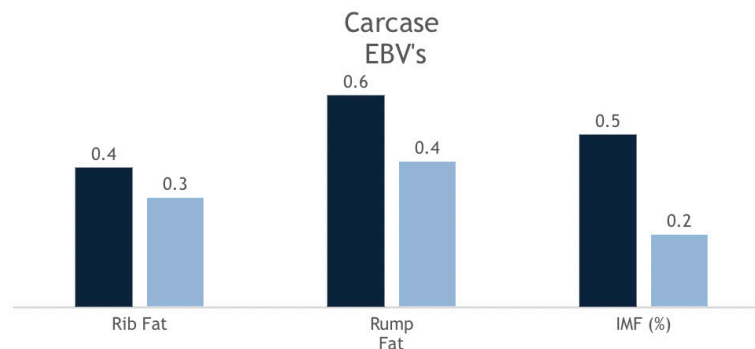

Although we understand that EBV's are not everything we believe they do help to illustrate the types of bulls we are aiming to produce. We submit large amounts of meaningful data each year to breedplan to help ensure the information is as accurate as it can be.

***At Rosedale we are always looking to improve our genetic pool in an effort to further satisfy our clients. We welcome all feedback you may have on our breeding program and objectives.***

Growth EBV's

Carcase EBV's

## VISUAL ASSESSMENT

When choosing bulls we recommend using a combination of EBVs, Raw Data and visual assessment. Visual assessment is essential to assess physical and structural soundness and is a reasonable indicator of health and temperament.

EBV's are a tool that will help you to make more "educated" decisions when you are choosing breeding stock. Do your homework well before the sale when you have plenty of time and set some parameters for your EBVs that fall within your market requirements, to narrow down potential purchases.

Use this "suitable list" of bulls and spend time looking and assessing the physical characteristics that you require.

## CARING FOR YOUR NEW BULL

Always be considerate to your bulls and handle them with respect and kindness. Handle them quietly, walk them rather than rushing them, treat them with care and in a gentle manner and they will do likewise.

A bull leaving ROSEDALE is leaving the security of a large mob and will arrive in a strange environment at the purchaser's property. Unload him and make sure he has a steer or cow as a companion straight away if you can't put him out into your bull mob immediately.

A young bull can move in with older bulls and settle well, but remember, being the youngest he will get the last of any feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed. Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle the cows quickly and efficiently.

ROSEDALE bulls are used to being handled by stockmen on motor bikes. Most of the fences are electrified and the bulls treat them with respect.

# SALE INFORMATION

**INSPECTION:** cattle inspections are welcome at any time prior to the sale by arrangement with the Vendor. Cattle will be yarded into pens by 9am sale day.

**MORNING TEA & LUNCH:** Will be available.

**LOCATION:** (map inside back cover)

1km out of Blayney on the Orange Road, turn left into Brown's Creek Road. Continue for 5kms and you will see "Rosedale Charolais Stud" on the left. Follow gravel road for 2kms.

**HEALTH:** All bulls catalogued have been semen tested and examined by Peter Brown of Bovine Breeders for structural soundness. All of our cattle receive 7 in 1 vaccinations at 4 months of age, then 6 weeks later and an annual booster. They were drenched at weaning and periodically according to worm counts. Cattle were last drenched with Flukozole C together with a 5in1 in March. The sale bulls have been vaccinated for Pestivirus (BVDV).

**RAW DATA:** All bulls will be scanned prior to the Sale for eye muscle area (EMA), rump and rib fat, marbling (IMF%) as well as sale weight and scrotal measurements. Supplementary sheet available on the day and on the rosedale website, along with photos of all the lots.

**ROSEDALE'S 12 MONTH GUARANTEE:** All stock have been evaluated for structural soundness and fertility. To the best of our knowledge the bulls are in sound working order at the time of the sale. Any claim against the breeding ability or a structural breakdown of any animal must be made in writing and accompanied by a Veterinary Certificate within 12 months of the sale date. Any animal failing to breed may be either replaced with an animal of similar value or credit made available to the value of the purchase price, minus salvage value, for use at a future Rosedale sale. The Purchaser will be responsible for any costs incurred.

**DELIVERY:** A delivery instruction slip must be completed and signed. Stock awaiting delivery will be held free of charge - all care will be taken, but absolutely no responsibility will be accepted for any injury or loss occasioned during, as a consequence of, or in relation to any holding. Rosedale offers a free delivery service locally and to Dubbo. We are more than happy to assist with all deliveries, please speak to us as we will go out of our way to help you get your purchases home safely and economically. We also can deliver cattle to CTLX, which is a transport hub for most major carriers. For Interstate buyers please speak to us directly as we can subsidise freight costs.

**INSURANCE:** Ownership passes at the fall of the hammer. An insurance representative will be in attendance on Sale day.

**TELEPHONE LINK-UP:** Mobile telephones will be available. Please arrange with the Vendor or Agent to ensure a line.

**AUCTIONS PLUS:** Our sale is conducted live on line in real time and will be interfaced on Auctions Plus with the physical auction that is being conducted. A computer is used to bring the on-site bid price to the internet screen for remote bidders to observe. Bidders can bid on computers at their location and the bid is immediately transferred to the auction barn and relayed to the auctioneer. Bidding is only available if registered with Auctions Plus. You must register on-line to their website [www.auctionsplus.com.au](http://www.auctionsplus.com.au) - at least 24 hours prior to the sale. For first time users of Auctions Plus we recommend you register as soon as possible and become familiar with the site. The staff in Sydney are very helpful and happy to guide you through it.

For more information contact:- Auctions Plus - (02)9262 4222

**3% REBATE:** The rebate will be offered to outside agents on the condition that a written introduction is received 48 hours prior to the sale and/or the agent accompanies the purchaser to the sale and settles on their behalf within 7 days. (This clause will be strictly adhered to.)

**TERMS AND CONDITIONS:** Terms of the sale are as per Conditions of Sale NSW Stud Stock.

**PLEASE NOTE:** It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in this sale on this sale premises.

**COVID 19:** Please follow directions and safety signs on sale day in regards to Covid 19. We will be working within current guidelines as set by the Australian Government. All guests will be required to sign in on arrival and adhere to current social distancing rules. Please be responsible and respectful of others and their health and safety and do not attend if you are not feeling well. Online Bidding and over the phone bidding is available and private inspections are welcomed and encouraged at any time prior to the sale by appointment.

**SALE DAY SAFETY:** All sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are risks associated with cattle handling. **Visitors enter the cattle pens at their own risk. Children must not enter pens.**

**DISCLAIMER:** People entering upon this property for any purpose whatsoever including attendance at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for theft loss or damage to any property caused or contributed to by us or by any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners their employees contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied no responsibility is accepted for any errors which may have occurred.

# UNDERSTANDING BREEDPLAN EBV'S

All bulls in this sale have been managed under identical conditions from the point of weaning, therefore comparisons can be made between animals of similar age. Weights, scans of EMA and IMF% and scrotal measurements will be available on the day of sale to further aid your visual assessment.

**Charolais Group Breedplan** is an advanced genetic evaluation system that provides a genetic description of Charolais cattle for a range of traits influencing fertility, growth and carcass performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all the available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information. EBVs are expressed in the units of measurement for each particular trait and are shown as +ive or -ive values. The Charolais breed average EBV for different traits changes over time as the breed makes genetic progress. The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait. The averages for calves born in 2014 are shown below and at the bottom of the Performance Data Summary. Please note that each breed has their own EBV and cannot be compared across breeds. All EBVs quoted in this catalogue are Charolais Group Breedplan EBVs and are directly comparable with the EBVs from other Charolais Group Breedplan herds.

## How to use EBVs

To use these figures successfully you must first determine which characteristics you desire to breed for and then select the EBV which best supports these qualities. It is important to note that in a successful breeding programme it is advisable to maintain balance and not to direct effort toward gaining a single, higher EBV for one particular trait.

**Birth Weight** is a major factor in calving difficulty. Use this EBV to select against birth weight if calving is a problem.

The lower the EBV the lighter the calves are expected to be at birth.

**200 Day Growth and Milk** is of particular interest to those targeting high weight gains at an early age to supply to the Domestic and Restaurant trade. Milk should be emphasized if the bull is being used to breed replacement progeny.

**400 and 600 Day Growth** indicates animals with superior weight gains from 12 months to 2 years of age, which would optimize profits in the domestic to Jap Ox markets.

**Accuracy (Acc.%)** provides an indication of the reliability of an EBV. As more performance information becomes available on an animal, it's progeny and relatives, the accuracy of it's EBVs for particular traits increases. The higher the accuracy the less chance the figure for each EBV will vary.

**Index Values** are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system.

**Domestic Index(\$)** Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430kgs (240kg HSCW and 6mm P8 fat) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

**Export Index(\$)** Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700kg (380kg HSCW and 9mm P8 fat) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

**Scrotal Size** is a good indicator of the bull's ability to produce sperm. A 2 year old bull with a testicle size of 34cm or more is regarded as satisfactory. Measurements will be available sale day.

Average Group Breedplan EBV's for 2017 born calves - March 2019 data.

Sire Appeal, Red Factor and Homozygous polled - Maverick is one of the best bulls we have produced in recent times. His first progeny are in this sale and they fantastic. Earlier maturity pattern, Excellent IMF and fantastic skin type. We expect a big future in this bull and have used him for 4 joinings in the past 2 years.

Exclusive to Rosedale, Landmark is doing all the things we asked for adding bone, muscle, style and growth to his progeny. Moderate birth weight calves that really grow into substance. His sire Silverstream Evolution needs no introduction to the charolais world but Landmark could be better yet. Was selected for his type and Excellent EMA and IMF raw measurements.

Homozygous polled, with growth and depth, softness combined with marbling ability. H168 has been joined heavily at Rosedale and maintained excellent body condition and structural correctness his entire working life. Retired from stud earlier this year after his 7th year around with feet still in excellent condition.

Pharoah is thick and easy doing and will really take your eye. Exceptional temperament and just a really good type. He is out of one of our favourite young cows and by the very successful Rosedale dealer. If you are looking to soften your herd and maintain performance this could be the bull.

Homozygous Polled.

Percy is an easy doing bull that looks very good in the paddock. With a soft golden coat, strong polled head and tremendous balance he sure will appeal to a lot of cattlemen. By no means the biggest bull in the draft but a very good moderate frame, natural thickness bred from two parents of the highest quality.

### Comments - HOMOZYGOUS POLLED

#### Top 25% 200 Day Growth, Top 5% EMA

A very impressive phenotype on this outstanding Lanmark son. Although a bit more moderate in stature this bull should not be overlooked. He has a great set of balanced numbers and carries himself so well for a bull with his power. He is out of our Favourite "J" cows and will be sure to breed on.

The word Tank comes to mind when we look at Quatity. The heaviest of these yearling bulls his growth for age is quite remarkable given the tough start he had to life being a drought calf. Very much a commercially focused bull with a lot to like about him.

### Comments

**Top 10% 200, 400, 600 Day, CWT Top 15% Milk, 20% IMF**

It's hard to sort these yearling bulls out but Quadrella could be the pick of them all. Red Factor, polled and exceptionally smooth with a bit of presence. His growth for age is right up there as is his appealing nature and strong polled head. Will suit stud or commercial, cannot go wrong with him.

### Comments - HOMOZYGOUS POLLED

**Top 25% 600 Day, CWT, CE Top 5% Milk, 20% IMF, Birth,**

A young Red Factor sire of the future who is also homozygous polled. Quad is thick soft and very eye appealing and will go onto breed extremely well. Out of a lovely long, soft and Feminine dam in conjunction with a strong milk figure we suggest he will go on to breed some high quality daughters to be proud of.

Quantum leap is a very sage to use young bull that will deliver reliable gains to your breeding operation. Below breed average birth weight with strong gains in growth. oozing class and style and just another very good type who is also Homozygous polled. His dam is a beauty and always has a good one.

The Last of the charolais draft but by no means the least. Some judges have labelled him the best of the yearling bulls in the sale. Red Factor, Homo Polled, Thick, square and Deep. This is a very classy bull to close out the draft. His dam is a terrific matron still breeding here at Rosedale. Stud Potential
