LEADING from the front FOR OVER 50 YEARS

Rosedale Charolais are your proven source of top quality polled Charolais genetics.

Rosedale continues to lead the way in Australia's carcass competitions with unrivalled success in recent times.

This is a true reflection that our breeding program is on the right track and that our genetics are out performing in a commercial situation.

We have a wide range of bulls to cover all Australian domestic and export markets including stud sire duties. We welcome your inspection and stand 100% behind the bulls we put on offer. We focus on growth and meat quality and this is reflected in our carcass competition successes.

Our cattle are specifically bred for profitable cross-breeding under Australian conditions.

ROSEDALE'S PROVEN COMMERCIAL PERFORMANCE IN AUSTRALIA'S BIGGEST INDEPENDENT FEEDLOT TRIALS.

NSW BEEF SPECTACULAR FEED LOT TRIAL

- 2013** Grand Champion Team, Most Profitable Team Reserve Champion Weight Gain
- 2014** 3 Teams in the Top 10 (out of 120 entered) 2nd Most Profitable Team
- 2016** Champion Weight Gain, Most Profitable
- 2017** Reserve Champion Weight Gain, 2nd most profitable Team. 3rd Overall
- 2018** Riverine Classic Champion
- 2019** 10th overall and 3 teams in the top 20.
- 2021** Grand Champion & Reserve Champion Team, (4 teams in the top 6)
- 2022** 3 Teams in the top 20

AUSTRALIAN NATIONAL FIELD DAYS

- 2015** Highest Carcass Points, 3rd overall
- 2017** Grand Champion Team, 1st and 2nd Carcass and yield.
- No Longer running

SYDNEY ROYAL BEEF CHALLENGE

- 2012** Grand Champion Domestic Team
- 2013** Grand Champion Export Team
- 2015** Grand Champion Domestic Team
- 2016** Grand Champion Export Team, 4th Domestic Team
- 2019** Branga Plains - Grand Champion Domestic Team (Rosedale Genetics)
- 2022** Grand Champion Domestic Individual Animal, Champion Eating Quality (domestic)

BRISBANE ROYAL Paddock TO PALATE

- 2017** Highest MSA Indexing Team (Domestic)
- 2019** Champion Domestic Team
- 2020** Reserve Champion Export Team HGP Free

WELCOME TO OUR 34TH ANNUAL BULL SALE

Welcome to our 34th On Property Annual sale at Rosedale. The past 12 months seem to have flown by so quickly! The cattle market is still going strong and even though there has been a recent price correction, it seems as if the market has found a new sustainable price level. This year the Australian Beef Industry will be looking to fill more and more export orders as the availability of supply has increased for the first time in 3 years since the herd rebuild after the drought. The weekly national cattle processing figures are recorded to be on the rise. This was seen with the average slaughter numbers nation wide for the first 14 weeks of 2023 at 101,372 head per week vs. last year the first 14 weeks of 2022 were at 83,564 head per week - a 21% increase! Also of interest, is that in the whole of 2022 the average weekly kill for 2023 year to date was only exceeded 6 times and 5 of those weeks were in the last quarter of the year. It goes to highlight how the shortage of supply really lifted prices as producers hung onto stock during the herd rebuild.

For those producers with a focus on terminal markets the next few years look promising from a production point of view. We are seeing premiums for breeding stock being eroded and the best money on offer is now in the fat markets or feedlots. A PTIC female last year carried a big premium over its terminal value but this year the breeder market has been smashed and only in rare pockets do we see this premium exist at all. In our opinion this is where the Charolais cross female really earns her stripes and excels in these conditions due to faster weight gains and quicker time to slaughter weight vs. a straight bred Angus female for example.

We are very proud of the Charolais bulls we have in this draft and think they line up evenly and are well suited for today's markets. We have focused on breeding for growth but also concentrating on fat cover and marbling as these traits relate to meat quality which are becoming more important as meat markets develop. We are also proud to announce that two thirds of the Charolais bulls in this draft are homozygous polled. This is the largest offering of homozygous polled bulls sold in Australia to date and is the reward for over 30 years on gradual genetic selection that has ensured the other production traits of our herd have not been compromised. It is no doubt that breeding polled cattle is best practice and as a result of years of hard work the homozygous bulls in this draft can fast track any program to producing polled cattle.

The composite bulls this year we are also very pleased with and our Charolais x Shorthorn composites could be our best line up yet. These composites are industry focused bulls and have proven to be very successful in many breeding programs. Our black Charolais x Angus bulls are gaining traction in traditional black commercial herds as the calves present with a bit more vigour with the 1/4 Charolais influence but still able to maintain Angus characteristics for marketing purposes.

All Animals purchased in the sale come with the Rosedale 12 month guarantee for fertility and structure. We stand behind the animals we sell and you can be assured when purchasing from Rosedale the quality is guaranteed. We are a family owned and managed business and we take a lot of pride, passion and care into what we do.

Inspections are available at any time leading up to the sale by appointment but we do welcome you all to come on sale day and look forward to catching up.

Supplementary information and pictures of all lots will be available on www.rosedalecharolais.com.au as well as Rosedale's Auctionsplus sale page.

Michael, Jenny and James Millner

NSW BEEF SPECTACULAR - FEEDLOT TRIAL

Last year we entered the Beef spectacular trial again with the presentation held in February earlier this year. Although unable to replicate the success of last year (Champion and Reserve champion team) the Rosedale infused teams did perform quite well.

Out of the 92 teams entered Rosedale Livestock finished 13th and 23rd, Millner Ag finished 19th and MJ & JL Millner finished 17th with Charolais and Charolais x British bred steers. This is a great event and the largest competition of its type in Australia. Teams are fed for 100 Days at Teys Jindalee Feedlot and then assessed on Feedlot performance, carcase and eating quality.

2022 RAS BEEF CHALLENGE - FEEDLOT TRIAL

Rosedale genetics performed admirably in the 2022 Royal Agricultural Society's Beef Challenge. In our 11th year entering the competition, Millner AG from Geurie won the Overall Individual Champion Animal in the Domestic section (70 Days on Feed) as well as Winning the Top Eating quality in the same section with a Charolais x Shorthorn team.

The competition is a commercially focussed feedlot competition representing all stages of the process including live assessment, carcase judging, profitability and eating quality.

GENETIC INVESTMENT at ROSEDALE

At the spring 2022 bull sales we secured Palgrove Spectacular for an Australian Charolais yearling record of \$90,000. Spectacular represents a total outcross for Rosedale going back to Sparrows Braxton from Canada as well as one of the finest cow families to come out of New Zealand represented by Silverstream Ocelot. His growth EBV's rank him up there with some of the best in the breed and he is extremely pleasing on the eye. We have high hopes for Spectacular and hope he can make an impact for years to come at Rosedale.

Another sire secured was Ascot Reputable, a homozygous polled son of the highly successful Rosedale Lump Sum. We have been chasing a Lump Sum son for some time and Reputable was a find at last years Ascot Sale.

These sires will complement our existing homebred sires and in combination with extensive AI programs will help progress our Charolais herd forward.

SALE INFORMATION

ROSEDALE SALE BULL EBV'S

Rosedale has been a member of Breedplan for over 35 years. This has helped assist us to consistently retain and source external genetics that have enabled us to produce the types of cattle you see in our paddocks today.

Genetic gain in growth rates has always been a priority of ours, but we understand sensible calving ease and birthweights need to be maintained. With our own commercial herd of 1000 British bred cows, we are very familiar with the benefits our Charolais bulls are delivering in a crossbreeding situation.

The graphs shown are a good 'measuring stick' as to where our sale bulls are compared to the Australian Charolais breed average.

Although we understand that EBV's are not everything we believe they do help to illustrate the types of bulls we are aiming to produce. We submit large amounts of meaningful data each year to breedplan to help ensure the information is as accurate as it can be.

VISUAL ASSESSMENT

When choosing bulls we recommend using a combination of EBVs, raw data and visual assessment. Visual assessment is essential to assess physical and structural soundness and is a reasonable indicator of health and temperament.

EBV's are a tool that will help you to make more "educated" decisions when you are choosing breeding stock. Do your homework well before the sale when you have plenty of time and set some parameters for your EBVs that fall within your market requirements, to narrow down potential purchases. Use this "suitable list" of bulls and spend time looking and assessing the physical characteristics that you require.

CARING FOR YOUR NEW BULL

Always be considerate to your bulls and handle them with respect and kindness. Handle them quietly, walk them rather than rushing them, treat them with care and in a gentle manner and they will do likewise.

A bull leaving Rosedale is leaving the security of a large mob and will arrive in a strange environment at the purchaser's property. Unload him and make sure he has a steer or cow as a companion straight away if you can't put him out into your bull mob immediately.

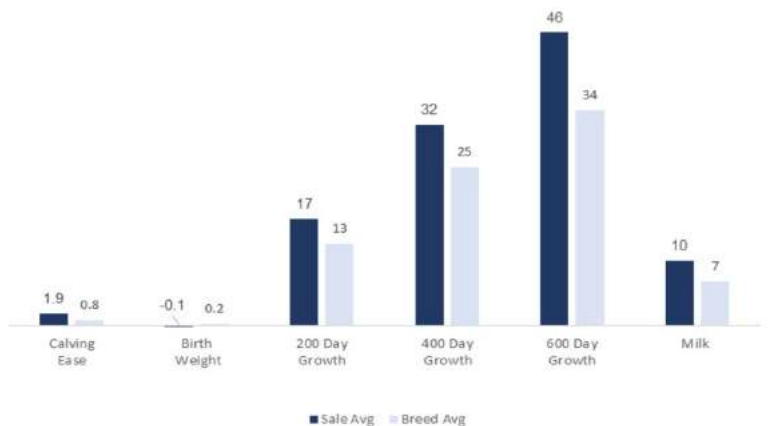

A young bull can move in with older bulls and settle well, but remember, being the youngest he will get the last of any feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed. Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle the cows quickly and efficiently.

Rosedale bulls are used to being handled by stockmen on motor bikes and have been mustered with dogs. Most of the fences are electrified and the bulls treat them with respect.

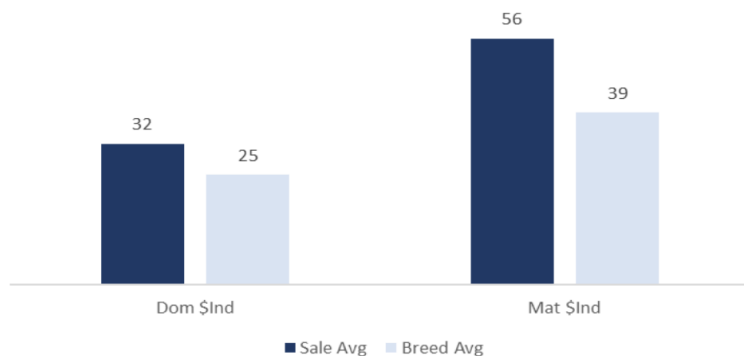

CARCASE EBV'S

PRODUCTION EBV'S

PROFITABILITY

INSPECTION: cattle inspections are welcome at any time prior to the sale by arrangement with the vendor. Cattle will be yarded into pens by 9am sale day.

MORNING TEA & LUNCH: Will be available.

LOCATION: (map inside back cover)

1km out of Blayney on the Orange Road, turn left into Brown's Creek Road. Continue for 5kms and you will see "Rosedale Charolais Stud" on the left. Follow gravel road for 2kms.

HEALTH: All bulls catalogued have been semen tested and examined for structural soundness by Peter Brown of Bovine Breeders. All of our cattle receive 7in1 vaccinations at 4 months of age, then 6 weeks later and an annual booster. They were drenched at weaning and periodically according to worm counts. Cattle were last drenched with Cydectin Platinum together with a 7in1 in April. The sale bulls have been vaccinated for Pestivirus (BVDV) as well as tested negative.

RAW DATA: All bulls will be scanned prior to the sale for eye muscle area (EMA), rump and rib fat, marbling (IMF%) as well as sale weight and scrotal measurements. Supplementary sheet available on the day and on the Rosedale website, along with photos of all the lots.

ROSEDALE'S 12 MONTH GUARANTEE: All stock have been evaluated for structural soundness and fertility. To the best of our knowledge the bulls are in sound working order at the time of the sale. Any claim against the breeding ability or a structural breakdown of any animal must be made in writing and accompanied by a Veterinary Certificate within 12 months of the sale date. Any animal failing to breed may be either replaced with an animal of similar value or credit made available to the value of the purchase price, minus salvage value, for use at a future Rosedale sale. The purchaser will be responsible for any costs incurred.

DELIVERY: A delivery instruction slip must be completed and signed. Stock awaiting delivery will be held free of charge - all care will be taken, but absolutely no responsibility will be accepted for any injury or loss occasioned during, as a consequence of, or in relation to any holding.

This year we will deliver all stock purchased at the sale to anywhere in Australia for a flat rate of \$100 per head, please talk to Elders about this when completing delivery slip.

INSURANCE: Ownership passes at the fall of the hammer. An insurance representative will be in attendance on sale day.

TELEPHONE LINK-UP: Mobile telephones will be available. Please arrange with the vendor or agent to ensure a line.

AUCTIONS PLUS: Our sale is conducted live on line in real time and will be interfaced on Auctions Plus with the physical auction that is being conducted. A computer is used to bring the on-site bid price to the internet screen for remote bidders to observe. Bidders can bid on computers at their location and the bid is immediately transferred to the auction barn and relayed to the auctioneer. Bidding is only available if registered with Auctions Plus. You must register on-line to their website www.auctionsplus.com.au - at least 24 hours prior to the sale. For first time users of Auctions Plus we recommend you register as soon as possible and become familiar with the site. The staff in Sydney are very helpful and happy to guide you through it.

For more information contact:- Auctions Plus - (02) 9262 4222

3% REBATE: The rebate will be offered to outside agents on the condition that a written introduction is received 48 hours prior to the sale and/or the agent accompanies the purchaser to the sale and settles on their behalf within 7 days. (This clause will be strictly adhered to.)

TERMS AND CONDITIONS: Terms of the sale are as per Conditions of Sale NSW Stud Stock.

PLEASE NOTE: It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in this sale on this sale premises.

PRE SALE INSPECTIONS : Private inspections are welcomed and encouraged at any time prior to the sale by appointment with Rosedale. Online Bidding and over the phone bidding is available on sale day for anyone unable to attend,

SALE DAY SAFETY: All sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are risks associated with cattle handling.

Visitors enter the cattle pens at their own risk. Children must not enter pens.

DISCLAIMER: People entering upon this property for any purpose whatsoever including attendance at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for theft loss or damage to any property caused or contributed to by us or by any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners their employees contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied no responsibility is accepted for any errors which may have occurred.

UNDERSTANDING BREEDPLAN EBV'S

All bulls in this sale have been managed under identical conditions from the point of weaning, therefore comparisons can be made between animals of similar age. Weights, scrotal measurements and scans of EMA and IMF% will be available on the day of sale to further aid your visual assessment. All registered Charolais bulls in this sale are sire verified and have DNA profiles on file ensuring what you see in this catalogue is correct.

Charolais Group Breedplan is an advanced genetic evaluation system that provides a genetic description of Charolais cattle for a range of traits influencing fertility, growth and carcass performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all the available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information. EBVs are expressed in the units of measurement for each particular trait and are shown as +ive or -ive values. The Charolais breed average EBV for different traits changes over time as the breed makes genetic progress. The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait. The averages for calves born in 2014 are shown below and at the bottom of the Performance Data Summary. Please note that each breed has their own EBV and cannot be compared across breeds. All EBVs quoted in this catalogue are Charolais Group Breedplan EBVs and are directly comparable with the EBVs from other Charolais Group Breedplan herds.

How to use EBVs

To use these figures successfully you must first determine which characteristics you desire to breed for and then select the EBV which best supports these qualities. It is important to note that in a successful breeding programme it is advisable to maintain balance and not to direct effort toward gaining a single, higher EBV for one particular trait.

Birth Weight is a major factor in calving difficulty. Use this EBV to select against birth weight if calving is a problem. The lower the EBV the lighter the calves are expected to be at birth.

200 Day Growth and Milk is of particular interest to those targeting high weight gains at an early age to supply to the Domestic and Restaurant trade. Milk should be emphasized if the bull is being used to breed replacement progeny.

400 and 600 Day Growth indicates animals with superior weight gains from 12 months to 2 years of age, which would optimize profits in the domestic to Jap Ox markets.

Accuracy (Acc.%) provides an indication of the reliability of an EBV. As more performance information becomes available on an animal, it's progeny and relatives, the accuracy of it's EBVs for particular traits increases. The higher the accuracy the less chance the figure for each EBV will vary.

Index Values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system.

Domestic Index(\$) Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430kgs (240kg HSCW and 6mm P8 fat) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index(\$) Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700kg (380kg HSCW and 9mm P8 fat) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Scrotal Size is an indicator of the bull's fertility. A 2 year old bull with 34cm is regarded as satisfactory by the Society.

Sire appeal, Red Factor and Homozygous polled - Maverick is one of the best bulls we have produced in recent times. The bulls and females in this sale are yet again fantastic. Maverick's strike rate for producing quality is as good as we have seen. Earlier maturity pattern, Excellent IMF and fantastic skin and structure.

Exclusive to Rosedale, Silverstream is doing all the things we asked - adds bone, muscle, style and growth to his progeny. Moderate BW calves that really grow into substance. His sire Silverstream Evolution needs no introduction to the Charolais world. He was selected for type and excellent EMA and IMF raw measurements. Trait leader 200 and 600 Day growth.

HOMOZYGOUS POLLED - One of the newest Canadian bulls to hit the Australian Charolais market and Rosedale secured exclusive breeding rights in partnership with Agri gene and some fellow leading breeders across Australia. Currently ranks in the top 1% for 200 and 400 Day growth. Smooth shouldered bulls that power on - his first sons sell this sale.

Top 25% Calving Ease, Top 20% Rib & Rump Fat, Top 15% Milk,

A good young Maverick calf to finish off the Charolais draft, quiet as a mouse and well put together. This bull is starting to hit his straps and will develop into a very useful easy doing sire. **Homozygous polled.**

COMPOSITE SIRES
