LEADING from the front FOR OVER 50 YEARS

Rosedale Charolais are your proven source of top quality polled Charolais genetics.

Rosedale continues to lead the way in Australia's carcase competitions with unrivalled success in recent times.

This is a true reflection that our breeding program is on the right track and that our genetics are performing in real world commercial situations.

We have a wide range of bulls to cover all Australian domestic and export markets, including stud sire duties. We welcome your inspection and stand 100% behind the bulls we put on offer. We focus on growth and meat quality and this is reflected in our carcase competition successes.

Our cattle are specifically bred for profitable cross-breeding under Australian conditions.

ROSEDALE'S PROVEN COMMERCIAL PERFORMANCE IN AUSTRALIA'S BIGGEST INDEPENDENT FEEDLOT TRIALS.

NSW BEEF SPECTACULAR FEED LOT TRIAL

- **2013** Grand Champion Team, Most Profitable Team Reserve Champion Weight Gain
- 2014 3 Teams in the Top 10 (out of 120 entered) 2nd Most Profitable Team
- 2016 Champion Weight Gain, Most Profitable
- 2017 Reserve Champion Weight Gain, 2nd most profitable Team. 3rd Overall
- 2018 Riverine Classic Champion
- 2019 10th overall and 3 teams in the top 20.
- 2021 Grand Champion & Reserve Champion Team, (4 teams in the top 6)
- 2022 3 Teams in the top 20
- 2023 3 teams in the Top 10 (4th, 7th, 8th)

SYDNEY ROYAL BEEF CHALLENGE

- 2012 Grand Champion Domestic Team
- 2013 Grand Champion Export Team
- 2015 Grand Champion Domestic Team
- 2016 Grand Champion Export Team, 4th Domestic Team
- 2019 Branga Plains Grand Champion Domestic Team (Rosedale Genetics)
- 2022 Grand Champion Domestic Individual Animal, Champion Eating Quality (domestic)
- 2023 Grand Champion Domestic Pen, Reserve Champion Domestic Pen, Most Profitable Team, Highest MSA Indexing Team

BRISBANE ROYAL PADDOCK TO PALATE

2017 Highest MSA Indexing Team (Domestic)
2019 Champion Domestic Team
2020 Reserve Champion Export Team HGP Free

Welcome to our 35th On Property Annual sale at Rosedale - a small milestone in itself to host our 35th Annual on property sale. On reflection it has been a great journey to be involved in and we have still remained relevant despite industry changes, trends and volatility at times. The Australian Beef industry has progressed significantly in that time and we have seen three major trends 1 - The export market has grown significantly and we now have a more diverse list of countries who rely on our beef- close to 70% of Australian Beef is now exported overseas. 2 - The Australian Feedlot sector has evolved significantly and now approximately 50% of all Australian Beef comes from grain fed systems. 3- The average carcase weight at slaughter has increased approximately 50 kg's over the past 35 years. While all emerging trends can be dissected and dismantled the one thing is clear - Australian Beef is a robust and diverse industry and we are a very important player in global food production. It is important to keep striving to make Australian beef a better product and at the same time make beef production as profitable as we can whilst also keeping in mind our carbon footprint.

Terminal sires continue to pave a way towards production efficiencies and lowering our Carbon footprint. The great thing is there is a huge correlation linking efficient production, meat quality and a low carbon footprint. The faster an animal gets to market the lower the carbon footprint that animal has in general terms. This efficiency in time to market also means that cattle are leaving our production systems earlier which not only improve cash flows but means our resources can be freed up for other purposes. Thirdly from a meat quality point of view the younger an animal can get to slaughter weight the higher the tenderness and meat quality with less ossification. A Charolais bull joined to a more moderate sized British or Bos Indicus based breeding female offers lower carbon footprint and calves will grow quicker and get to market faster. Efficiencies of up to 20% can be achieved and a the end result is a great product.

We are very proud of the Charolais bulls we have in this draft and think they line up evenly and are well suited for today's markets. We have focused on breeding for growth but also concentrating on fat cover and marbling as these traits relate to meat quality which are becoming more important as meat markets develop and relate to both grain and grass fed production systems. We are also proud to announce that over 3 quarters of the Charolais bulls in this draft are homozygous polled. This is the largest offering of homozygous polled bulls sold in Australia to date and is the reward for over 35 years on gradual genetic selection that has ensured the other production traits of our herd have not been compromised.

The composite bulls this year we are also very pleased with and our Charolais x Shorthorn composites are yet again very impressive bulls. These composites are industry focused bulls and have proven to be very successful in many breeding programs. Our black Charolais x Angus bulls are gaining traction in traditional black commercial herds as the calves present with a bit more vigor with the 1/4 Charolais influence but still able to maintain Angus characteristics for marketing purposes. We have seen some great success's with these bulls which are relatively new on the market.

All Animals purchased in the sale come with the Rosedale 12 month guarantee for fertility and structure. We stand behind the animals we sell and you can be assured when purchasing from Rosedale the quality is guaranteed. We are a family owned and managed business and we take a lot of pride, passion and care into what we do. Supplementary information and pictures of all lots will be available on www.rosedalecharolais.com.au as well as Rosedale's Auctionsplus sale page. Inspections are welcome at any time.

Michael, Jen and James Millner

ROSEDALE CHAROLAIS NEWS

CARCASE TRIAL SUCCESS

NSW BEEF SPECTACULAR

For the 10th year in a row we entered the NSW Beef Spectacular with very pleasing results claiming 3 teams in the top 10.

A team from Rosedale Livestock finished 4th overall out of 90 teams whilst MJ Millner finished 7th and 8th overall with Rosedale Blood steers. The Rosedale team also finished 3rd in the weight gain section of the competition.

RAS BEEF CHALLENGE

Rosedale genetics performed very successfully in the 2023 RAS Beef challenge taking out both Reserve and Champion Team in the Domestic section of the competition. The steers were fed for 70 Days before going to Coles for processing. Rosedale also took out the most profitable team as well as the trophy for feedlot performance.

In the 100 Day export section of the competition Millner Ag won the eating quality award for the highest indexing team as well as the carcase grid award for their Charolais x Angus steers.

Our teams also received two RAS Silver medals for outstanding individual carcase's.

MERRIWA WOOLWORTHS CARCASE TRIAL

In 2023 the Merriwa Carcase Trial recommenced again and we supported it with some Charolais/Angus teams. The trial is successfully run on the Gill families's Alexander Downs Feedlot and cattle are fed on an 80 Day program prior to being processed for Woolworths. A team of Rosedale Blacks (brothers to the bulls in this sale) won the weight gain section of the competition. They beat 73 other teams in the trial with a weight gain fo 2.49kg/day over 80 days.

GENETIC INVESTMENT at ROSEDALE

In 2023 we crossed the ditch to New Zealand and inspected the Silverstream and Hemingford herds, arguably the two best herds in the country. It had been five years since our previous visit and we were impressed at the progression of polled Charolais breeding in that time. The New Zealand beef industry is based predominantly on pasture based systems so a lot of their production goals align with ours.

We found two sires of note that we have brought exclusively back to Australia and look forward to the first progeny this coming spring. The two sires are Silverstream Springston (pictured) and Hemingford Rough Justice.

Springston was the bull with the highest fat score out of the entire Silverstream draft. He ranked highly for weight gain and EMA. In addition to this he is very sound, a great type and is also homozygous polled.

Rough Justice is a deep, thick and fleshy bull who is breeding very well for Hemingford. He combines power with well rounded carcase traits .

ROSEDALE SALE BULL EBV'S

Rosedale has been a member of Breedplan for over 35 years. This has helped assist us to consistently retain and source external genetics that have enabled us to produce the types of cattle you see in our paddocks today.

Genetic gain in growth rates has always been a priority of ours, but we understand sensible calving ease and birthweights need to be maintained. With our own commercial herd of 1000 British bred cows, we are very familiar with the benefits our Charolais bulls are delivering in a crossbreeding situation.

The graphs shown are a good 'measuring stick' as to where our sale bulls sit as a group compared to the Australian Charolais breed average.

Although we understand that EBV's are not everything we believe they do help to illustrate the types of bulls we are aiming to produce. We submit large amounts of meaningful data each year to breedplan to help ensure the information is as accurate as it can be.

PRODUCTION EBV'S

VISUAL ASSESSMENT

When choosing bulls we recommend using a combination of EBVs, raw data and visual

assessment. Visual assessment is essential to assess

physical and structural soundness and is a reasonable indicator of health and temperament.

EBV's are a tool that will help you to make more "educated" decisions when you are choosing breeding stock. Do your homework well before the sale when you have plenty of time and set some parameters for your EBVs that fall within your market requirements, to narrow down potential purchases.

Use this "suitable list" of bulls and spend time looking and assessing the physical characteristics that you require.

CARING FOR YOUR NEW BULL

Always be considerate to your bulls and handle them with respect and kindness. Handle them quietly, walk them rather than rushing them, treat them with care and in a gentle manner and they will do likewise.

A bull leaving Rosedale is leaving the security of a large mob and will arrive in a strange environment at the purchaser's property. Unload him and make sure he has a steer or cow as a companion straight away if you can't put him out into your bull mob immediately.

A young bull can move in with older bulls and settle well, but remember, being the youngest he will get the last of any feed available because of the pecking order. The paddock needs to be reasonably large so he can keep away from the others and find adequate feed. Young bulls are still growing fast and need enough feed to maintain their growth pattern and be able to settle the cows quickly and efficiently.

Rosedale bulls are used to being handled by stockmen on motor bikes and have been mustered with dogs. Most of the fences are electrified and the bulls treat them with respect.

SALE INFORMATION

INSPECTION: cattle inspections are welcome at any time prior to the sale by arrangement with the vendor. Cattle will be yarded into pens by 9am sale day.

MORNING TEA & LUNCH: Will be available all day. Please stay for a drink following the sale.

LOCATION: (map inside back cover)

1km out of Blayney on the Orange Road, turn left into Brown's Creek Road. Continue for 5kms and you will see "Rosedale Charolais Stud" on the left. Follow gravel road for 2kms.

HEALTH: All bulls catalogued have been semen tested and examined for structural soundness by Dr. John Sullivan. All of our cattle receive 7in1 vaccinations at 4 months of age, then 6 weeks later and an annual booster. They were drenched at weaning and periodically according to worm counts. Cattle were last drenched with Cydenctin Platinum together with a 7in1 in April. The sale bulls have been vaccinated for Pestivirus (BVDV) as well as tested negative.

RAW DATA: All bulls will be scanned prior to the sale for eye muscle area (EMA), rump and rib fat, marbling (IMF%) as well as sale weight and scrotal measurements. Supplementary sheet available on the day and on the Rosedale website, along with photos of all the lots.

ROSEDALE'S 12 MONTH GUARANTEE: All stock have been evaluated for structural soundness and fertility. To the best of our knowledge the bulls are in sound working order at the time of the sale. Any claim against the breeding ability or a structural breakdown of any animal must be made in writing and accompanied by a Veterinary Certificate within 12 months of the sale date. Any animal failing to breed may be either replaced with an animal of similar value or credit made available to the value of the purchase price, minus salvage value, for use at a future Rosedale sale. The purchaser will be responsible for any costs incurred.

DELIVERY: A delivery instruction slip must be completed and signed. Stock awaiting delivery will be held free of charge - all care will be taken, but absolutely no responsibility will be accepted for any injury or loss occasioned during, as a consequence of, or in relation to any holding.

This year we will deliver all stock purchased at the sale to anywhere in Australia for a flat rate of \$150 per head, please talk to Elders about this when completing delivery slip.

INSURANCE: Ownership passes at the fall of the hammer. An insurance representative will be in attendance on sale day.

TELEPHONE LINK-UP: Mobile telephones will be available. Please arrange with the vendor or agent to ensure a line.

AUCTIONS PLUS: Our sale is conducted live on line in real time and will be interfaced on Auctions Plus with the physical auction that is being conducted. A computer is used to bring the on-site bid price to the internet screen for remote bidders to observe. Bidders can bid on computers at their location and the bid is immediately transferred to the auction barn and relayed to the auctioneer. Bidding is only available if registered with Auctions Plus. You must register on-line to their website www.auctionsplus. com.au - at least 24 hours prior to the sale. For first time users of Auctions Plus we recommend you register as soon as possible and become familiar with the site. The staff in Sydney are very helpful and happy to guide you through it.

For more information contact:- Auctions Plus - (02) 9262 4222

AGENTS REBATE: A 1% rebate will be offered to outside agents on the condition that a written introduction is received 48 hours prior to the sale and settles on their clients behalf within 7 days. (This clause will be strictly adhered to.) Only agents attending the sale in person will qualify for a 3% rebate also on the condition settlement occurs within 7 days on their clients behalf.

TERMS AND CONDITIONS: Terms of the sale are as per Conditions of Sale NSW Stud Stock.

PLEASE NOTE: It is unethical for anyone to promote, advertise or arrange the sale of any cattle, other than those in this sale on this sale premises.

PRE SALE INSPECTIONS: Private inspections are welcomed and encouraged at any time prior to the sale by appointment with Rosedale. Online Bidding and over the phone bidding is available on sale day for anyone unable to attend.

SALE DAY SAFETY: All sale bulls have been screened for temperament and are quiet to handle under normal circumstances. However, there are risks associated with cattle handling.

Visitors enter the cattle pens at their own risk. Children must not enter pens.

DISCLAIMER: People entering upon this property for any purpose whatsoever including attendance at cattle auctions do so at their own risk. We are not liable to you for any personal injury or death suffered by you and for theft loss or damage to any property caused or contributed to by us or by any other person whether caused or contributed to by or by negligence deliberate act or unlawful conduct. "We" or "us" or "our" refer to the owners their employees contractors and agents and each of them. While every care has been taken in compiling this catalogue to ensure accuracy of information supplied no responsibility is accepted for any errors which may have occurred.

All bulls in this sale have been managed under identical conditions from the point of weaning, therefore comparisons can be made between animals of similar age. Weights, scrotal measurements and scans of EMA and IMF% will be available on the day of sale to further aid your visual assessment. All registered Charolais bulls in this sale have been GENOMIC tested are sire verified ensuring what you see in this catalogue is correct.

Charolais Group Breedplan is an advanced genetic evaluation system that provides a genetic description of Charolais cattle for a range of traits influencing fertility, growth and carcase performance. It provides predictions of the genetic merit of individual animals called Estimated Breeding Values (EBVs). EBVs are based on all the available pedigree and performance records provided by breeders in Australia and New Zealand, along with available overseas genetic information. EBVs are expressed in the units of measurement for each particular trait and are shown as +ive or –ive values. The Charolais breed average EBV for different traits changes over time as the breed makes genetic progress. The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait. The averages for calves born in 2022 are shown below and at the bottom of the Performance Data Summary. Please note that each breed has their own EBV and cannot be compared across breeds. A low accuracy means there is more possibility of change in an EBV.

How to use EBVs

To use these figures successfully you must first determine which characteristics you desire to breed for and then select the EBV which best supports these qualities. It is important to note that in a successful breeding programme it is advisable to maintain balance and not to direct effort toward gaining a single, higher EBV for one particular trait.

Birth Weight is a major factor in calving difficulty. Use this EBV to select against birth weight if calving is a problem. The lower the EBV the lighter the calves are expected to be at birth.

200 Day Growth and Milk is of particular interest to those targeting high weight gains at an early age to supply to the Domestic and Restaurant trade. Milk should be emphasized if the bull is being used to breed replacement progeny.

400 and 600 Day Growth indicates animals with superior weight gains from 12 months to 2 years of age, which would optimize profits in the domestic to Jap Ox markets.

Accuracy (Acc.%) provides an indication of the reliability of an EBV. As more performance information becomes available on an animal, it's progeny and relatives, the accuracy of it's EBVs for particular traits increases. The higher the accuracy the less chance the figure for each EBV will vary.

Index Values are reported as EBVs, in units of relative earning capacity (\$'s) for a given market. They reflect both the shortterm profit generated by a sire through the sale of his progeny, and the longer-term profit generated by his daughters in a self-replacing cow herd. A selection index combines the EBVs with economic information (costs and returns) for specific market and production systems to rank animals based on relative profit values. Note that different types of animals can give similar profit values, so consideration should be given to both the index and the component EBVs when selecting animals for a particular production system.

Domestic Index(\$) Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting grass-finished production for the domestic trade. This Index assumes pasture grown & finished steers weighing 430kgs (240kg HSCW and 6mm P8 fat) at 12 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Export Index(\$) Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd with a British cow base targeting the production of steers for export markets. This Index assumes pasture grown & finished steers weighing 700kg (380kg HSCW and 9mm P8 fat) at 29 months. Daughters are retained or sold for breeding therefore maternal traits are of importance. In response to industry feedback, positive emphasis has been placed on finishing ability.

Scrotal Size is an indicator of the bull's fertility. A 2 year old bull with 34cm is regarded as satisfactory by the Society.

Sire appeal, red factor and homozygous polled - Maverick is one of the best bulls we have produced in recent times. The bulls and females in this sale are yet again fantastic. Maverick's strike rate for producing quality is as good as we have seen. Earlier maturity pattern, excellent IMF and fantastic skin and structure.

extensively. Quartermaster is leading performance bull complemented by breed leading carcase data. It's very rare to find a bull in the top 3% for marbling that also can mix it with the best in terms of growth.

ROSEDALE QUAMBONE (P)

An excellent son of Rosedale Lump Sum, and a bull we have admired since seeing him as a yearling. After a failed attempt to purchase the bull for ourselves (due to a technological malfunction) Jim kindly sent us some semen. We are very pleased with his calves, who are growthy yet soft with plenty of carcass.

A homebred sire we have successfully used in the stud. Some of his sons are of outstanding quality. A rare bull in the Charolais breed that ranks in the top 1% for IMF as well as the top 10% for 200 Day growth. A very commercially focused bull out of a strong cow line. (Pictured above is Quambones sire - Palgrove Mandate)

HOMOZYGOUS POLLED - One of the newest Canadian bulls to hit the Australian Charolais market and Rosedale secured exclusive breeding rights in partnership with Agri gene and some fellow leading breeders across Australia. Currently ranks in the top 1% for 200 and 400 Day growth. Smooth shouldered bulls that power on.

A bull that has been used in the stud and commercial herd with great success over the years. By the infamous H168 out of a strong Expo cow this bull has bred really well and has some stunning sons in this draft. Big topped yet still laying on the fat cover. A trait leader for Growth and EMA. (pictured above at 18 months).

HOMOZYGOUS POLLED - sons coming through from the sale topping bull purchased from Kenmere 2020. Pompeii was the 2019 Charolais National Junior champion Bull and seems to be breeding visually appealing progeny with growth.

Another tremendous son of Turnbull's Duty Free. Absolute curve bender ranking in the top 1% for 200 Day growth and top 20% for birth weight. You have to admire the length and volume of this bull and he is supported by some exceptional carcase data.

\$

Top 25% 400 & 600 Day.

A slightly younger bull that continues to impress. This is a sire that packs in a lot of thickness and red meat in a moderate package. L55 is a deep sided easy doing cow who always grabs your eye. A lot of potential here.

HEMINGFORD ROUGH JUSTICE

Rough Justice is a new sire we are excited about. His first calves will be in late spring and we can't wait to see how he combines with our cows. He will be used heavily in our AI programs this year.

HOMOZYGOUS POLLED - TOP 5% MILK, TOP 20% 600 DAY A nice looking red bull with thickness who is yet again an easy doing type meaning progeny will lay on the cover easier. A very quiet attitude makes him a pleasure to deal with and his dam is a moderate but very tidy cow.

TOP 5% RIB & RUMP FAT, IMF %

An exciting slightly younger bull by Quizmaster who has some high level carcase data ranking with the best in the breed for fats and IMF.

of growing left in him. He's always had natural width and softness.

ROSEDALE TEX (P)

The final quartermaster son and yet again love the length, thickness and well rounded carcase traits. A great commercial bull in the making.

HOMOZYGOUS POLLED Top 25% 200, 400, 600 Day, IMF

A really well made bull by Pompeii going back to a top young cow from a strong family. Excellent growth index's and carcase scans and a very impressive phenotype.

> Born: Society ID:

07/09/2022 MR22T193E

TOP 15% 200 DAY, TOP 5% 400 DAY, TOP 10% 600 DAY, MILK, CWT A lot of meat in this big growthy bull by Pompeii. Some real power but also the softness to go with it which is what we strive for.

A soft and sweet Quizmaster beauty. I really like this heifer and think she is one of the picks. Growth, style and very well structured.

A classy and thick yet feminine heifer by Quizmaster. L258 has been a very consistent producer for us and is a deep fleshy cow with a great udder. We expect Bobbin to grow into a lovely cow.
